

PRICELIST ^{AC²}Sensor

To give a total overview of your AC power consumption, Racktivity has complemented its product line with a new family of power meter and monitoring devices.

Our AC²Sensor can be installed at the AC power distribution board or in distributed remote locations such as PoPs, base stations, and head ends.

The unit features a DIN rail mountable design and Ethernet connectivity and supports 8 inputs for current measurements.

The AC²Sensor provides you with the missing element for a complete power monitoring solution and solves any issues with large or distributed estates of AC powered equipment.

With this addition, Racktivity give you the tools to measure and analyse your data in order to prevent downtime and reduce your carbon footprint.
